Prescriptive Recommendations

- Review rider safety messaging for age group 66 to 75, which has 15,663 records and a 30.0% serious/fatal share in the filtered data.
- Consider visibility interventions for Darkness no lights conditions because this group shows a 26.2% serious/fatal share across 25,165 records.
- Prioritize road-type safety review for Dual carriageway locations, where the filtered data shows 59,037 records and a 21.2% serious/fatal share.
- Treat these priorities as descriptive signals for safety review, not causal proof.
